

DANBRED

A woman with long brown hair, wearing a dark t-shirt and a tool belt, is leaning over a metal railing in a pigpen. She is looking down at a small pink piglet that is standing on the metal grate. In the background, a larger pig is visible in a stall. The scene is set in a well-lit, industrial-style pigpen.

DanBred Hybrid

BRED FOR BUSINESS

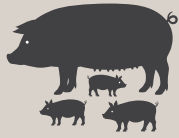

DanBred Hybrid

The most prolific hybrid for production of optimal finishers.

To constantly optimise your pig production, you need effort and passion. And a proven dam line, like the DanBred Hybrid. She will deliver large litters of uniform, vital pigs with a significant daily gain and excellent feed-to-meat conversion. You will profit from her exceptional mothering abilities and high longevity, which, year after year, improves your results.

DanBred Hybrid is a first cross between DanBred Landrace and DanBred Yorkshire. She is the optimal dam line and ensures high efficiency in your production by combining the best traits. When crossed with the DanBred Duroc, the result is world-class finishers.

DanBred Hybrid has great mothering abilities and is docile

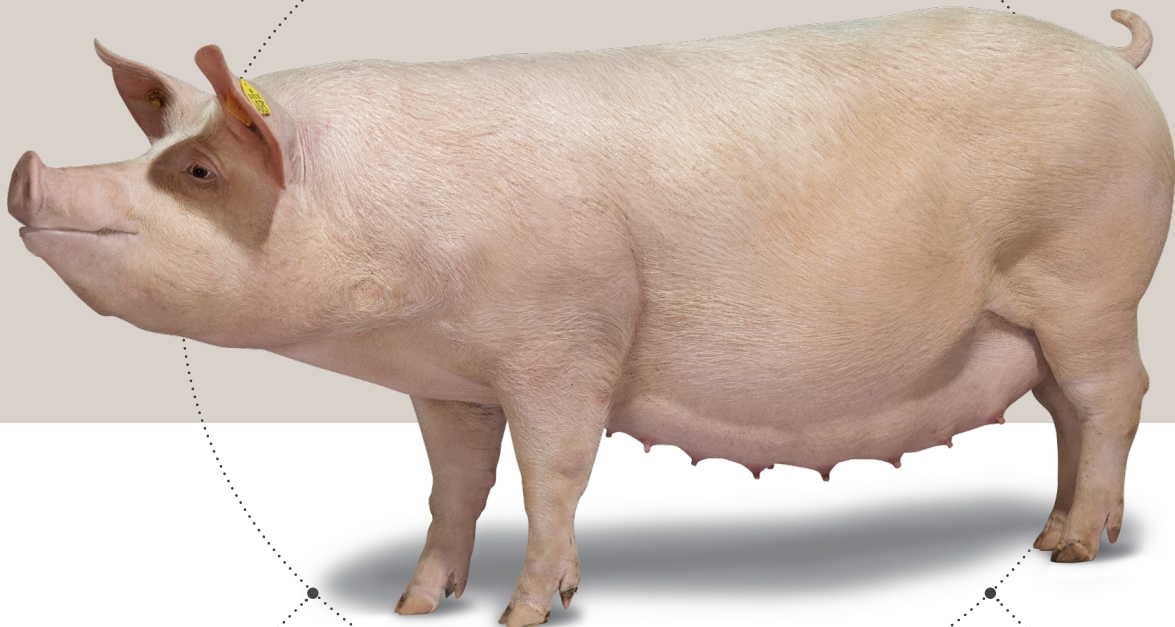

DanBred Hybrid has good longevity, and, thus, a large lifetime production

DanBred Hybrid has fast-growing and feed efficient offspring

DanBred Hybrid is social and easy to manage

DanBred Hybrid produces many robust 'full value pigs'

DanBred Hybrid produces large litters of vital piglets with high survival rates

PERFORMANCE

Benchmark KPIs

The table shows the benchmark KPIs for production herds with DanBred Hybrid. It proves that great results are achieved worldwide.

	Liveborn	Weaned/litter	Weaned/sow/year
Denmark	18.5	15.8	35.4
Denmark, top 5	19.7	17.9	42.1
France	17.5	14.8	35.8
Netherlands	17.3	14.5	34
Spain	18	13	29.3
China	16.4	14.5	34.8
Vietnam	16	14.5	32
Philippines	17.2	15.8	37.5
Thailand	16.9	15.2	34.2
Brazil	16	15	37.2
South Africa	14.1	12.5	28.9

BALANCED BREEDING

Strong and consistent progress

Producing more pork using fewer resources is key to achieving a more sustainable pig production in the future. It is a fundamental premise of DanBred's balanced breeding programme to contribute through continuous breeding progress.

The traits in the DanBred breeding goal can be divided into three groups: **productivity**, **robustness**, and **reproduction**. Research into breeding and genetics shows that there are both favourable and unfavourable genetic relationships between the different traits. This means we need to prioritise in order to find the optimal balance between all of the important traits in the breeding goals. In DanBred, the optimal balance is determined based on the economic effect that each trait has on your pig production.

DanBred Hybrid improves the performance and productivity of your production. She is known for adaptability and a docile temper, which makes her well-suited for modern pig production. Add to that her maternal traits and great mothering abilities. She will efficiently nurture her offspring while causing no trouble for her handlers. DanBred Hybrid produces uniform litters of robust and vital piglets. That is why we say: **DanBred Hybrid is bred for business.**

Breeding goal: DanBred Landrace & DanBred Yorkshire

PRODUCTIVITY

Piglet and weaner growth

Finisher growth

Feed conversion

Lean meat percentage

Killing out **32 %**

ROBUSTNESS

Piglet survival

Sow survival

Conformation

62 %

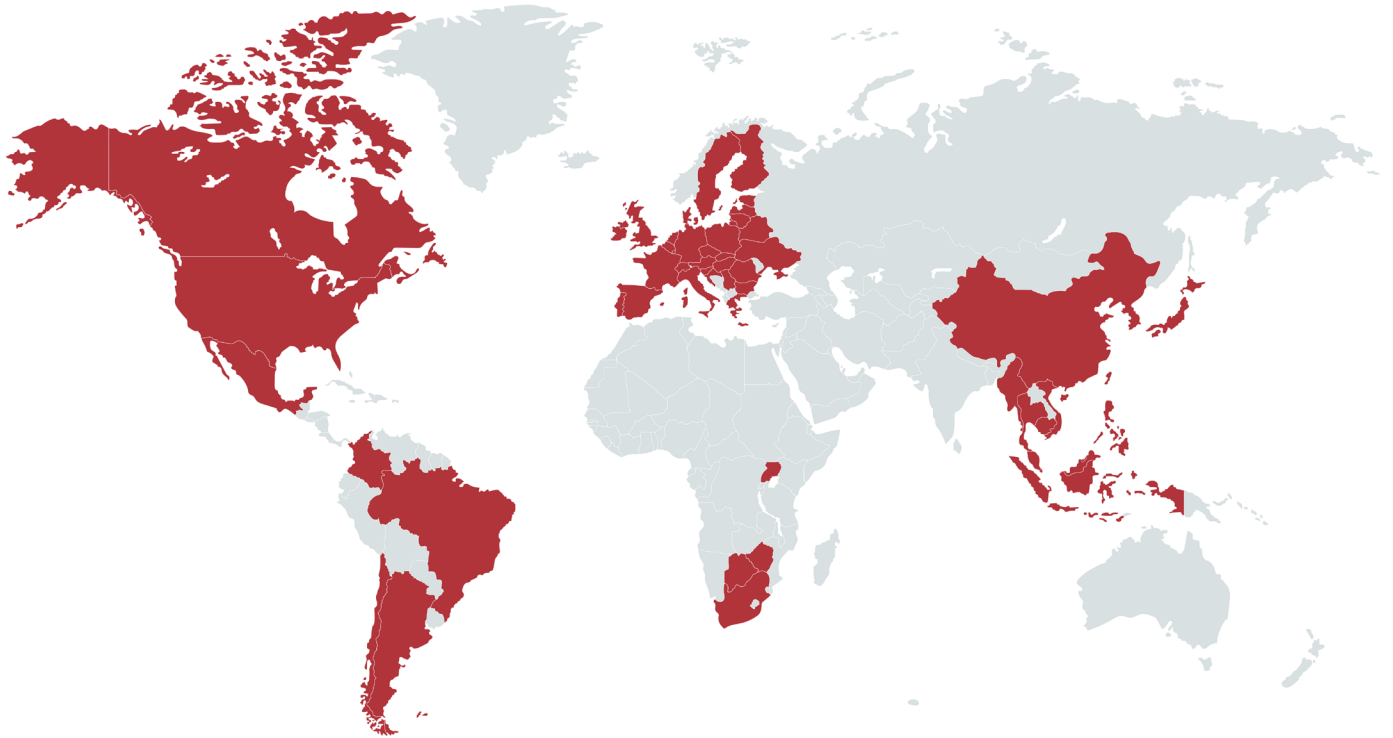

REPRODUCTION

Litter size **6 %**

AVAILABLE WORLDWIDE

Improve your business

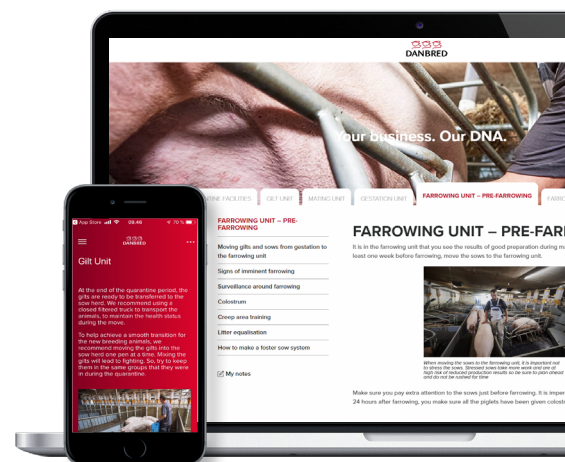

DanBred Hybrid is available all over the world. The growing need for local production of food is an attractive opportunity for highly efficient DanBred multiplication herds. We have a strong network of the best multipliers to satisfy the strong market demands for our productive pigs.

With the **DanBred Manuals**, you get the management support you need to release the full potential of DanBred genetics. These are your practical guides for every stage of your pigs' life cycles. Through easy-to-follow guides, detailed photos and videos, as well as illustrative graphics, we help you set up the correct routines and strategies in your production.

Your business. Our DNA.

DanBred is one of the world's leading international pig breeding companies supplying pig genetics and practical support.

DanBred has highly reliable breeding data. 120,000 breeding pigs are performance tested every year in our breeding herds and at our testing station.

DanBred sets long-term, balanced breeding goals, which are revised regularly. This ensures that the breeding progress for DanBred Duroc, DanBred Landrace, and DanBred Yorkshire creates a sustainable high profit for our partners.

Well-documented genetics and comprehensive service solutions are the foundation of DanBred. This has made DanBred the first choice for leading pig producers all over the world, who expect optimal, predictable business results.

DanBred P/S is owned by the Danish Agriculture & Food Council, Danish Agro, and Holdingselskabet DBI A/S.
